A L L D R E A M S S T A R T O N T H E R O A D

We believe that wood is not only a production material, but also a living entity that tells stories. Each imperfection whispers a tale of the tree's journey with its own character. That's why we minutely source our wood from sustainable forests, ensuring the feasibility of responsible applications that protect our environment and promote the longevity of these precious resources. Welcome to our world of exquisite furniture, where detailed craftsmanship meets sustainability!

SOMETIMES YOU HAVE TO START **WITHOUT REGARDING THE CONDITIONS.**

If you were born in a city that lives with furniture, it means that furniture has somehow touched a part of your life. In addition, if you come from a productive tradition that was kneaded with this culture from generations ago, your road will definitely pass through this sector. Therefore, it would not be wrong to see being appointed as the hero of the story as a predestination of the Supreme God.

However, the thing that will set you apart among thousands of heroes and stories is to dare a grueling brand journey that will create added value for all your stakeholders.

That is your intention. On this road we set out with a genuine intention and sincerity, our only goal is to continue our journey successfully and make it permanent.

—————

■ Sedat PORTAKAL
Founder

REAL SUCCESS IS POSSIBLE WITH THE RIGHT TEAM

“This is İnegöl, a global furniture production center where thousands of producers supply furniture all over the world. The strong producer identity of İnegöl furniture is indisputable both in terms of design and product quality. However, it is not possible to say the same words about branding and sustainability. Therefore, I owe Yol Living’s existence story to my employers, whose road I could not improve with my personal vision even though I worked for it.”

Yol Living, which we brought to life in 2014 by centering total quality on the focus of R&D, innovation, design, production and service, is rapidly moving towards the point we dreamed of with a white-collar employment rate of 35%, an export volume over 70% and a 0.2% after-sales service rate today. And of course, we are still at the very beginning of the road.

First of all, I believe that real success will come with the right team no matter what you do. With this awareness and approach, I formed my management team with the participation of both important names in the sector and my family members who are experts in their fields. With the experience from this cooperation, we have included high-energy and dynamic professionals in all our departments and we still continue to do so. Thus, we train our own qualified personnel.

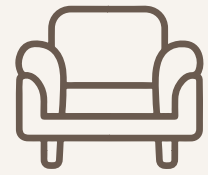

We owe this great acceleration of Yol Living in a short time to the invaluable contributions made by our stakeholders, the right steps taken in the teaming process, and our valuable colleagues who embrace their work. By taking advantage of this opportunity, I would like to express my gratitude to everyone who has worked with us and contributed to Yol Living.

In my management philosophy, the right system comes after the right team. If you cannot build your branding vision on a functional and sustainable system, the commercial successes achieved will soon become nothing more than memories. At this very point, we strive to invest in our work and our employees rather than individual wealth. We are very happy to share the added value created by our business and to commune with all our stakeholders. We want to leave a legacy built on solid roots, both for our own children and for the children of our employees. We are striving with all our might to transform Yol Living, which is today known as one of the leading furniture producers in Turkey, into a Turkish brand that has a voice in the world.

If you are dreaming of crossing the ocean, the ship you embark on must be capable of the voyage and withstand the difficult conditions. Our strongest principle that will carry us to the other side of the water on this journey is quality. That’s why we will never stop trying until we get the best.

Hereby, I would like to express that we will be happy to see you beside us during this fascinating journey and share the same excitement, presenting my respect.

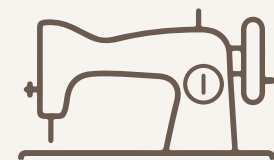

We create our high quality and durable sofas by ensuring the perfect harmony of handcraft and modern production techniques.

Carried out by an experienced and passionate team, our production process is shaped by skillful processing of carefully selected materials.

Using the latest modern technologies, we pay special attention to every detail of our designs.

Quality control steps are strictly followed in our production process as we maintain superior quality standards at every stage.

LIPA

Dining Room

The ingredient materials of the console include natural wood veneered MDF body, HAFELE branded hinges with brakes, and the best quality domestic paint. The ingredient materials of the oval table include natural wood veneered MDF top, electrostatically painted metal legs mounted using bolts/steel dowel system, and the best quality domestic paint.

LIPA Console

Three HAFELE branded hinges with brakes are used on each door with the purpose of preventing the doors from deflection.

LIPA / Oval Table

There will be no case of breakage or detachment since the legs are connected using bolt/steel dowel system.

Glass Doors Block
Glass used on the doors are surrounded by aluminum frames.

LIPA / Wall Panel
Glass Shelf Block
Glass used on the doors are tempered for ultimate security.

LIPA / Wall Panel
Single Block
HAFELE branded materials are used as the fasteners of the product.

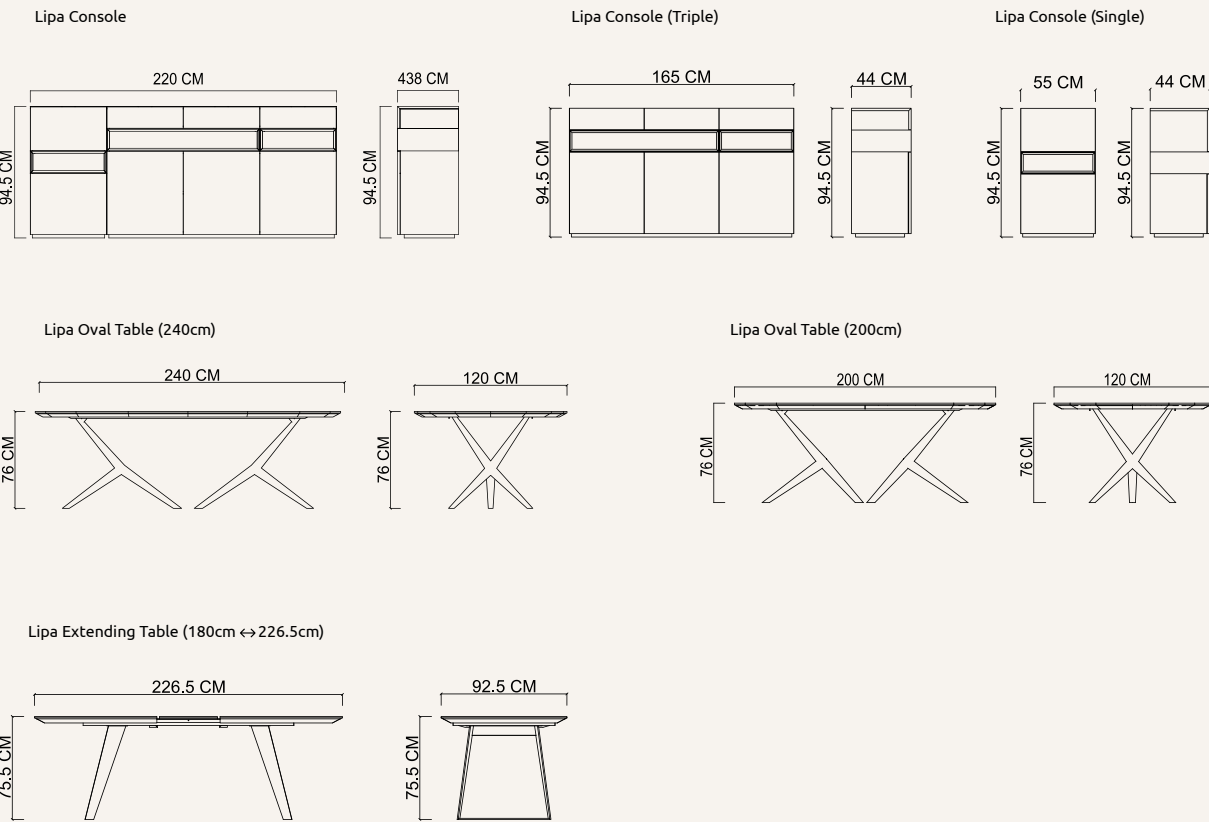

LIPA / Wall Panel
Middle Block
HETTICH branded slow-motion rail system is used inside the drawers.

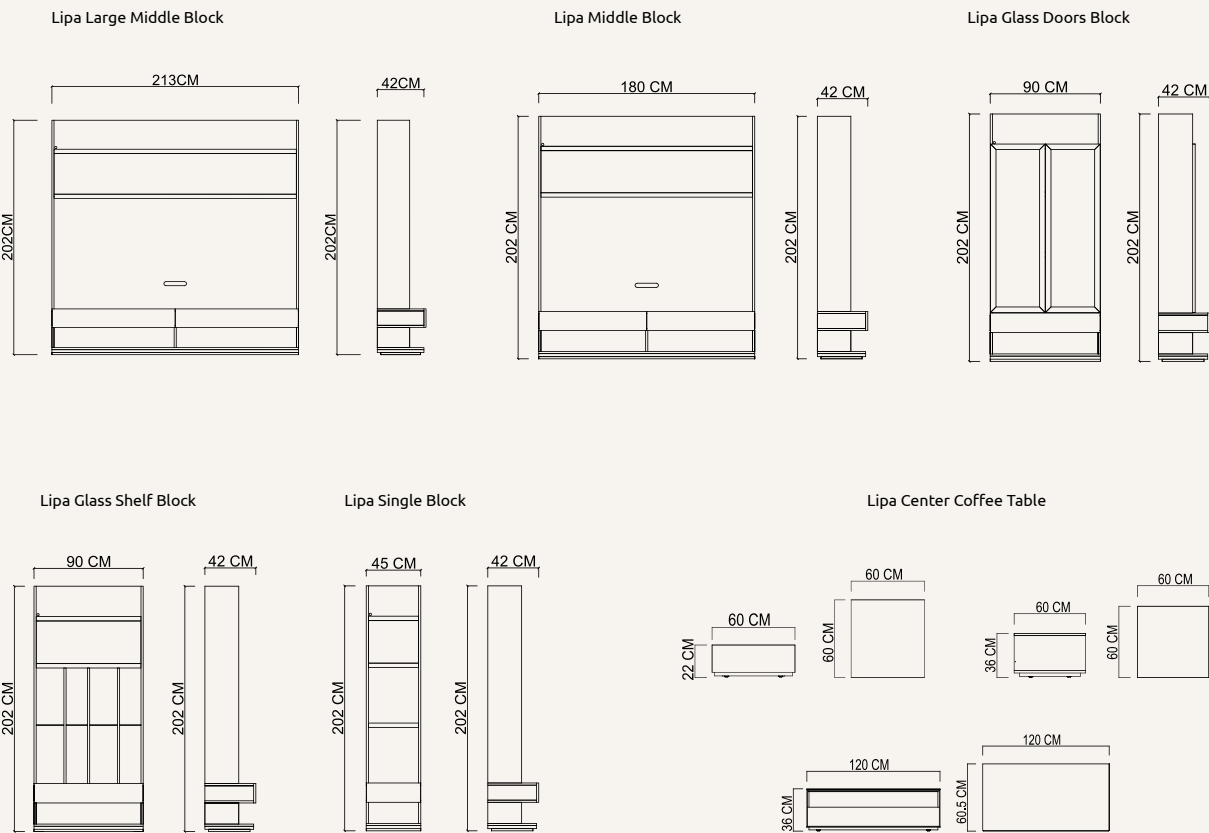

LIPA Center Coffee Table

This product is composed of two coffee tables and a pouf. The ingredient materials of the coffee tables include walnut veneered MDF body, HAFELE branded fasteners, the best quality domestic paint, and steel balls at the bottom for easy movement. The pouf comes upholstered.

LIPA Dining Room

LIPA Wall Unit

LORETTA

Sofa

This is a modular product which you can create your very own combination by choosing from various modules. Strengthened by oblong joining process, the ingredient material of the frame is plywood pieces reinforced with beech wood. All sections of the sofa including seats, armrests and backrests contain piping application, CNC-processed fabrics, and foam materials wrapped with laminated fiber for extra comfort.

LORETTA / Sofa

LORETTA / Sofa

The most compatible materials for seating and backrests have been chosen so that the user can feel the comfort during the use of the product. All fabrics are cut in CNC machines. Each piece is standardized and quality-controlled.

Piping application is made for the back and armrest sections of the sofa. The cushions are mixture of three materials (goose down, bead silicon and trimmings). Cloth is preferred for the undercoat and the outer fabric is strippable.

GLORIA

Bedroom

The ingredient materials of the bed include first-class MDF body, feather foam for the headboard, and metal legs attached to electrostatically painted metal profiles used as the main carrier of the product. The ingredient materials of the nightstand and the dresser include natural wood coated MDF top and beech wood legs. The dresser mirror is mountable to the wall thanks to the metal material behind its frame. The wardrobe contains demountable shelves and HAFELE branded hinges with brakes on each door. All products contain HAFELE branded fasteners and all products with drawers contain HETTICH branded rail systems.

■ Bedstead
The main body frame of the product is first-class 18 mm MDF.

■ Wardrobe

■ Wardrobe (Interior View)

The height of the hangers can be increased or decreased when desired.

■ Dresser & Dresser Mirror

The top table is natural wood coated MDF.

■ Nightstand

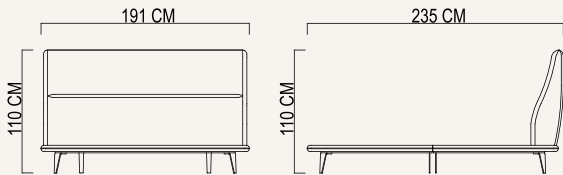

There will be no case of breakage or detachment since the legs are connected to the profiles using nut and bolt system.

FRANKA

Sofa

This is a modular product which you can create your very own combination by choosing from various modules. The ingredient material of the frame is plywood pieces reinforced with beech wood. Coming forward with its soft structure and high flexibility, hyper foam is used for the backrests. In order to maintain form of the cushions, cloth material is used for underlining. In the name of elegant view and comfortable use; cushion fillings contain bead silicone, feather foam, and sponge trimmings filled at specific proportions using sensitive scales.

■ FRANKA / Sofa

Triple ■

All of our fabric molds, frames and foams are processed in CNC machines for the standardization of products at some critical points. This provides the opportunity to sell products to the customer with the same visual and quality as displayed.
